

# Table of contents

## SECTION I Differential diagnoses for owner chief concerns and physical examination findings

Chapter <b>1 Vomiting</b> .....	1	Chapter <b>7 Lethargy/stupor/pacing</b> .....	29
<i>Melanie Werner</i>		<i>Susana Monforte</i>	
■ Pathophysiology .....	1	■ Pathophysiology .....	29
■ Clinical signs .....	1	■ Clinical signs .....	29
■ Diagnostic approach .....	3	■ Diagnostic approach .....	30
Chapter <b>2 Diarrhea</b> .....	7	Chapter <b>8 Jaundice</b> .....	33
<i>Melanie Werner</i>		<i>Frederik Allan</i>	
■ Pathophysiology .....	7	■ Pathophysiology .....	33
■ Clinical signs .....	7	■ Clinical signs .....	34
■ Diagnostic approach .....	8	■ Diagnostic approach .....	34
Chapter <b>3 Weight loss</b> .....	13	Chapter <b>9 Dark feces or melena</b> .....	37
<i>Mellora Sharman, Marina Martín-Ambrosio</i>		<i>Floris Dröes</i>	
■ Pathophysiology .....	13	■ Pathophysiology .....	37
■ Clinical signs .....	14	■ Clinical signs .....	38
■ Diagnostic approach .....	14	■ Diagnostic approach .....	38
Chapter <b>4 Poor appetite/no appetite</b> .....	17	Chapter <b>10 Abdominal enlargement</b> .....	41
<i>Sofia Rapastella, Mellora Sharman</i>		<i>Giulia Cattaneo</i>	
■ Pathophysiology .....	17	■ Pathophysiology .....	41
■ Clinical signs .....	17	■ Clinical signs .....	42
■ Diagnostic approach .....	18	■ Diagnostic approach .....	42
Chapter <b>5 Polyphagia</b> .....	21	Chapter <b>11 Cranial abdominal pain</b> .....	47
<i>Beatrice Ruggerone, Fabio Procoli</i>		<i>Giulia Cattaneo</i>	
■ Pathophysiology .....	21	■ Pathophysiology .....	47
■ Clinical signs .....	22	■ Clinical signs .....	47
■ Diagnostic approach .....	22	■ Diagnostic approach .....	48
Chapter <b>6 Polyuria/polydipsia</b> .....	25	Chapter <b>12 Petechiae and ecchymoses</b> .....	51
<i>Beatrice Ruggerone, Fabio Procoli</i>		<i>Floris Dröes</i>	
■ Pathophysiology .....	25	■ Pathophysiology .....	51
■ Clinical signs .....	26	■ Clinical signs .....	51
■ Diagnostic approach .....	26	■ Diagnostic approach .....	53

## SECTION II Diagnosis of exocrine pancreatic disease

Chapter <b>13 Nonspecific laboratory findings in pancreatic disease</b> .....	57	■ Hyperbilirubinemia .....	58
<i>Yvonne McGrotty</i>		■ Hyperlipidemia .....	58
■ Azotemia .....	57	■ Hypoalbuminemia .....	60
■ Increased liver enzymes .....	58	■ Hypoglycemia .....	62
		■ Hyperglycemia .....	64

■ Urinalysis .....	64	Chapter <b>15</b> <b>Pancreatic imaging</b> .....	81
■ Hypocalcemia .....	64	<i>Angela Marolf</i>	
■ Neutrophilia .....	66	■ Radiographic imaging of the pancreas .....	81
■ C-reactive protein .....	66	■ Ultrasound imaging of the pancreas .....	82
■ Coagulopathies .....	66	■ Computed tomographic imaging	
■ Hypocobalaminemia .....	69	of the pancreas .....	84
■ Abdominal effusions .....	71	■ Summary .....	85
■ Laboratory changes as prognostic indicators		Chapter <b>16</b> <b>Pancreatic biopsy</b> .....	87
in pancreatic disease .....	71	<i>Laura J. Owen</i>	
Chapter <b>14</b> <b>More specific laboratory tests</b>		■ Indications for pancreatic biopsy .....	87
<b>for exocrine pancreatic disease</b> .....	73	■ Anatomy of the pancreas .....	87
<i>Harry Cridge</i>		■ Open vs. laparoscopic approach .....	87
■ Diagnosis of pancreatitis – noninvasive assays ..	73	■ Biopsy technique .....	88
■ Exocrine pancreatic insufficiency –		■ Processing of biopsy samples and	
noninvasive assays .....	78	interpretation of results .....	90
		■ Postoperative care .....	91
		■ Complications of pancreatic biopsy .....	91
<b>SECTION III Diseases of the exocrine pancreas</b>			
Chapter <b>17</b> <b>Introduction to the anatomy and physiology</b>		■ Treatment .....	124
<b>of the exocrine pancreas</b> .....	93	■ Prognosis .....	125
<i>Ran Nivy, Asaf Berkowitz</i>		Chapter <b>21</b> <b>Neoplasia of the exocrine pancreas</b>	129
■ Anatomy of the pancreas in dogs .....	93	<b>in dogs</b> .....	
■ Pancreatic physiology: fluid components,		<i>Antonio Giuliano, Jane Dobson</i>	
regulation and protective mechanisms .....	94	■ Etiology .....	129
Chapter <b>18</b> <b>Acute pancreatitis</b> .....	99	■ Clinical features and biological behavior .....	129
<i>Sue Yee Lim, Jörg M. Steiner</i>		■ Clinical pathology findings and diagnostic	
■ Disease definition .....	99	imaging .....	130
■ Etiology .....	99	■ Treatment and prognosis .....	130
■ Pathophysiology .....	101	Chapter <b>22</b> <b>Nutrition for acute and chronic</b>	
■ Diagnosis .....	102	<b>pancreatitis and exocrine pancreatic</b>	
■ Management .....	105	<b>insufficiency</b> .....	133
■ Prognosis .....	109	<i>Daniel L. Chan</i>	
Chapter <b>19</b> <b>Chronic pancreatitis</b> .....	111	■ Nutritional considerations in dogs with acute	
<i>Panagiotis G. Xenoulis, Jörg M. Steiner</i>		pancreatitis .....	133
■ Classification and definitions .....	111	■ Nutritional plan for dogs with acute	
■ Prevalence .....	111	pancreatitis .....	133
■ Etiology .....	112	■ Parenteral nutritional support of dogs with	
■ Signalment .....	112	acute pancreatitis .....	134
■ Diagnosis .....	112	■ Nutritional considerations for dogs with	
■ Clinical picture .....	112	chronic pancreatitis .....	135
■ Routine clinical pathology .....	113	■ Exocrine pancreatic insufficiency .....	135
■ Diagnostic imaging .....	114	■ Role of appetite stimulants in dogs with	
■ Pathology .....	115	pancreatic disease .....	136
■ Treatment of chronic pancreatitis .....	116	Chapter <b>23</b> <b>Analgesia in acute</b>	
■ Complications of chronic pancreatitis .....	117	<b>and chronic pancreatitis</b> .....	139
Chapter <b>20</b> <b>Exocrine pancreatic insufficiency</b> .....	121	<i>Ian Self</i>	
<i>Daniel Batchelor</i>		■ Disease definition and etiology .....	139
■ Disease definition/etiology .....	121	■ Clinical presentation and features .....	139
■ Clinical presentation/features .....	123	■ Clinicopathological findings .....	140
■ Clinicopathological findings .....	123	■ Other diagnostic procedures .....	140
■ Diagnostic imaging findings .....	124	■ Treatment of pancreatitis pain .....	141
■ Other diagnostic procedures .....	124		

**SECTION IV Diagnosis of hepatobiliary disease**

Chapter <b>24</b>	<b>Nonspecific laboratory tests in hepatobiliary disease</b> .....	<b>147</b>			
	<i>Cassia Hare</i>				
	■ Nonspecific changes on biochemistry screens .....	<b>147</b>			
	■ Complete blood count and coagulation tests .....	<b>152</b>			
	■ Urinalysis .....	<b>156</b>			
	■ Ascites .....	<b>156</b>			
Chapter <b>25</b>	<b>Laboratory tests more specific for hepatobiliary disease</b> .....	<b>159</b>			
	<i>Alice Tamborini</i>				
	■ Liver enzyme activities .....	<b>159</b>			
	■ Bilirubin .....	<b>160</b>			
	■ Bile acids .....	<b>162</b>			
	■ Ammonia .....	<b>162</b>			
	■ Other potential diagnostic tests .....	<b>164</b>			
Chapter <b>26</b>	<b>Imaging the liver, biliary system, and portal vasculature</b> .....	<b>167</b>			
	<i>Abby Caine</i>				
	■ Imaging the liver parenchyma .....	<b>167</b>			
	■ Use of advanced imaging techniques to image the liver parenchyma .....	<b>172</b>			
	■ Ultrasound-guided biopsy and fine-needle aspiration of the liver parenchyma .....	<b>172</b>			
	■ Imaging the biliary system .....	<b>173</b>			
	■ Imaging the portal vasculature .....	<b>175</b>			
Chapter <b>27</b>	<b>Liver biopsy</b> .....	<b>179</b>			
	<i>Laura J. Owen</i>				
	■ Indications for biopsy and preoperative assessment .....	<b>179</b>			
	■ Surgical anatomy of the liver .....	<b>179</b>			
	■ Open vs. laparoscopic approach .....	<b>179</b>			
	■ Biopsy technique .....	<b>179</b>			
	■ Processing of biopsy samples .....	<b>181</b>			
	■ Postoperative care .....	<b>181</b>			
	■ Complications of liver biopsy .....	<b>182</b>			
Chapter <b>28</b>	<b>Interpretation of cytological examination of the liver</b> .....	<b>183</b>			
	<i>Carlo Masserdotti</i>				
Chapter <b>29</b>	<b>Interpretation of liver biopsy reports</b> .....	<b>187</b>			
	<i>Sean McDonough</i>				
	■ Definition of common terms used in liver pathology .....	<b>187</b>			
	■ Basic patterns of liver injury .....	<b>189</b>			

**SECTION V Diseases of the liver, gallbladder, and biliary tract**

Chapter <b>30</b>	<b>Introduction to the liver anatomy and physiology</b> .....	<b>195</b>			
	<i>Francesco Lotti</i>				
	■ Liver anatomy: gross anatomy and anatomic relationships .....	<b>195</b>			
	■ Blood supply .....	<b>195</b>			
	■ The biliary system .....	<b>195</b>			
	■ Microscopic structure of the liver .....	<b>195</b>			
	■ Physiology of the liver .....	<b>197</b>			
Chapter <b>31</b>	<b>Acute toxic hepatopathy</b> .....	<b>201</b>			
	<i>Karyn Bischoff</i>				
	■ Introduction to hepatic detoxification and toxicity .....	<b>201</b>			
	■ Pathophysiology of acute toxic hepatitis .....	<b>202</b>			
	■ Overview of clinical and clinicopathological signs of acute toxic hepatopathy .....	<b>202</b>			
	■ Summary of some important hepatotoxins .....	<b>204</b>			
	■ Diagnostic approach to a suspected case of acute toxic hepatopathy .....	<b>205</b>			
	■ Testing for specific toxins .....	<b>205</b>			
	■ Treatment of hepatotoxicosis .....	<b>205</b>			
	■ Prognosis for dogs with acute toxic hepatopathy .....	<b>206</b>			
Chapter <b>32</b>	<b>Acute infectious liver disease and hepatic abscess</b> .....	<b>209</b>			
	<i>Katie Elizabeth McCallum</i>				
	■ Introduction and sequelae of acute infectious liver disease .....	<b>209</b>			
	■ Clinical features .....	<b>209</b>			
	■ Clinicopathological findings .....	<b>210</b>			
	■ Diagnostic imaging findings .....	<b>210</b>			
	■ Prebiopsy considerations .....	<b>211</b>			
	■ Bacterial causes of acute liver disease and hepatic abscesses .....	<b>211</b>			
	■ Viral causes of acute liver disease .....	<b>215</b>			
	■ Protozoal causes of acute liver disease .....	<b>216</b>			
	■ General approach to treatment of acute infectious liver disease .....	<b>216</b>			
	■ Prognosis .....	<b>217</b>			
Chapter <b>33</b>	<b>Chronic hepatitis: copper-associated</b> .....	<b>219</b>			
	<i>Rommaneeya Leela-arporn, Cynthia RL Webster</i>				
	■ Etiology .....	<b>219</b>			
	■ Pathophysiology .....	<b>220</b>			
	■ Clinical features .....	<b>220</b>			
	■ Clinicopathologic findings .....	<b>221</b>			
	■ Diagnostic imaging .....	<b>221</b>			
	■ Cytology .....	<b>222</b>			
	■ Liver biopsy acquisition .....	<b>222</b>			
	■ Liver biopsy evaluation .....	<b>223</b>			
	■ Biomarkers .....	<b>224</b>			
	■ Treatment .....	<b>224</b>			
	■ Monitoring treatment .....	<b>225</b>			
	■ Prognosis .....	<b>226</b>			

Chapter **34** **Chronic hepatitis: idiopathic, autoimmune, and other non-copper-associated causes** . . . 227  
*Adam G. Gow*

- Etiology . . . . . 227
- Pathophysiology . . . . . 229
- Systemic consequences of chronic liver disease . . . 229
- Clinical features . . . . . 230
- Clinicopathological findings . . . . . 231
- Diagnostic imaging findings . . . . . 231
- Histopathologic findings . . . . . 231
- Management of chronic hepatitis . . . . . 232
- Prognosis with the treatment of canine chronic hepatitis . . . . . 236

Chapter **35** **Gallbladder and biliary tract diseases: mucoceles, biliary tract, and gallbladder infections** . . . . . 239  
*Ben Harris*

- Function of the biliary system . . . . . 239
- Gallbladder structure and function . . . . . 239
- Bacterial cholangitis and cholecystitis . . . . . 240
- Gallbladder mucocele . . . . . 242
- Gallbladder sludge . . . . . 243
- Cholelithiasis . . . . . 243

Chapter **36** **Congenital vascular diseases** . . . . . 247  
*Michael S. Tivers*

- Disease definition . . . . . 247
- Clinical presentation/features . . . . . 248
- Clinicopathological findings . . . . . 249
- Diagnostic imaging findings . . . . . 249
- Treatment . . . . . 250
- Prognosis . . . . . 253

Chapter **37** **Other congenital liver diseases: ductal plate and gallbladder disorders** . . . 257  
*Andre J. Kortum*

- Normal biliary tract development . . . . . 257
- Development and classification of ductal plate malformations . . . . . 258
- Diseases of the small intrahepatic ducts . . . . . 258
- Diseases of medium-sized intrahepatic ducts . . . 261
- Diseases of extrahepatic and large intrahepatic ducts . . . . . 262
- Other extrahepatic biliary anomalies . . . . . 264

Chapter **38** **Canine vacuolar hepatopathies, hepatocutaneous syndrome, and amyloidosis** . . . . . 267  
*Sharon Kuzi*

- Vacuolar hepatopathies . . . . . 267
- Hepatocutaneous syndrome . . . . . 269
- Hepatic amyloidosis in dogs . . . . . 271

Chapter **39** **Liver tumors in dogs** . . . . . 275  
*Luca Schiavo, Jane M. Dobson*

- Incidence and risk factors . . . . . 275
- Classification and biological behavior . . . . . 275
- History and clinical signs . . . . . 277
- Diagnosis . . . . . 277
- Treatment . . . . . 279
- Prognosis . . . . . 280

Chapter **40** **Nutrition for acute and chronic liver disease** . . . . . 283  
*Becca Leung*

- Energy requirements . . . . . 283
- Protein . . . . . 283
- Fat . . . . . 285
- Digestible and nondigestible carbohydrates . . . . 285
- Vitamins . . . . . 286
- Minerals . . . . . 286
- Conclusion . . . . . 287

**Index** . . . . . 289
